

BRYAN CHORA

Austin, TX | 737-465-2803 | bryanchora@gmail.com | <https://www.linkedin.com/in/bryan-chora>

EDUCATION

The University of Texas at San Antonio

Dec 2025

Bachelor of Science, Computer Science, Data Science

- **GPA:** 3.5
- **Achievements:** Achieved Dean's List recognition in Fall 2024 and Spring 2025, Won the UTSA Hackathon CQ Hacks 2025 in the category of Best Theme Design

EXPERIENCE

UTSA's College of AI, Cyber and Computing

Oct 2024 - Present

Student Assistant

San Antonio, Texas

- Coordinated logistical support for events involving over 600 students and 40 faculty/staff members, ensuring effective communication and smooth operations

Haven For Hope

Summer 2025

Data Science - Internship

San Antonio, Texas

- Collaborated with a multidisciplinary team of three interns to ingest, clean, and analyze 16,000+ private donation and grants records, creating a donor-behavior profiling dataset with 32 features using Python and data manipulation libraries
- Conducted rigorous statistical analysis with non-parametric hypothesis tests (Kruskal-Wallis with Dunn's post hoc, $p < 0.001$) to interpret campaign performance, demonstrating strong analytical and data mining capabilities

PROJECTS

Private Donation Analysis - Data Science Internship

Summer 2025

- Applied Python workflows for data wrangling and exploratory analysis of 16,000+ donation records
- Consolidated raw transaction records into a donor-behavior profiling dataset 4,500+ rows and delivered findings in an executive report to guide campaign investment and donor engagement

Object Detection -Senior Design American Tenet

Spring 2025

- Collaborating with a 6-person team to develop an object detection framework inspired by the YOLOv5 architecture but redesigned for proprietary commercial use
- Serving on the Head + Losses Team, responsible for implementing the detection head, box regression losses (CIoU/DIoU/GIoU), and classification/objectness losses
- Supporting deployment of the trained model into a prototype product for American Tenet

Door AI - ACM Club Project

Jan 2024

- Developed a facial recognition system using Python, TensorFlow, and NumPy for secure door access
- Integrated with Raspberry Pi, servo motor, and custom movement detection for automation
- Led a team of hardware and software students, assigning tasks based on strengths and optimizing collaboration
- Enhanced algorithm accuracy to ensure reliable performance in varied conditions

Mad Dash to Wonderland- CQ Hacks 2025

Jul 2024

- Led a team of three freshmen to victory in the Best Theme Design category by developing an infinite runner game
- Designed and implemented core gameplay using Python (Pygame), applying object-oriented programming principles
- Guided teammates by assigning tasks and teaching them how to use GitHub for collaboration

RELEVANT COURSEWORK

- **Technical:** VSC, GitHub, MySQL, Jupyter, React, Linux, API, Node.js, TypeScript, Android Studio, Excel, Powerpoint
- **Soft Skills:** Adaptability, Communication, Teamwork, Problem-Solving, Quick Learner
- **Strong Proficiency:** Java, C++, Python (Data Science), C
- **Data Science Tools:** Pandas, NumPy, Scikit-Learn, PostgreSQL, PyTorch, Data Manipulation, TensorFlow

ACTIVITIES

ACM (Association Computer Machine)

Active Member

- Develop programming, competitive and collaborative skills by participating in Hackathons, Building Projects and Networking

Cristian Church of Bastrop

Volunteer (2 years)

- Operated and maintained the audio/sound system during services and events; also served as a youth leader, mentoring teens and supporting community activities
